product-year fixed effects product-year-destination fixed effects Yes No No No No No 5,832,345 5.826,965 5.685.472 5,797,240 5,569,459 5.711.688 0.5730.3210.318 0.3200.3210.319

Observations This table estimates eq(3). Note that 'Eligible' refers to the regime entitle

to VAT refund, our treatment group. Our control group is processing trade

with supplied input, 'Non-Eligible' to VAT refund. Sectors are defined following the Chinese 4-digit GB/T industry classification and regroup several products.

Heteroskedasticity-robust standard errors clustered at the product level appear in-

parentheses. * Significance at the 10%, ** Significance at the 5%, *** Significance
